

MULTIFUNCTIONAL HEAT TRANSFER ROLLER MACHINE

www.colorwinmachines.com

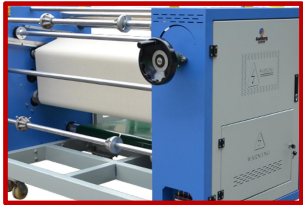

Multifunctional Heat Transfer Roller Machine

● Features

Multifunctional design

The multi-functional design can be transferred into pieces and cut pieces, especially suitable for small batch transfer and proofing.

Excellent flat transfer printing

The color of the transfer effect is more vivid, and the flat transfer effect can be achieved.

Efficient receiving system

The belt-conducting automatic receiving system has the function of pressurization, the transfer speed is faster.

Durable unwinding device

Manual unwinding device to prolong the service life of the blanket.

Electroplating technology drum

The drum adopts Teflon-plated technology, which has strong hardness, wear resistance, anti-sticking, and good transfer effect.

- ★ Equipped with an external fuel tank, it is convenient to add heat transfer oil, has the unique advantage of automatic shutdown and explosion-proof, and has high safety performance.
- ★ The hardware adopts high-tech configuration. The main wall panel and rollers have been professionally reinforced and manufactured. .
- ★ Optional automatic fabric folding and unwinding system.

● Specification

Specifications	Power(kw)	Tablesizem(m)	Voltage(v)
20*120	6	1.5	220/380
20*170	12	1.5	220/380
30*120	9	1.5	220/380
30*170	18	1.5	220/380
