

# High Pressure Press Machine 80X100CM S-8010

# 80X100CM High Pressure Press Machine | S-8010

## ● Features

### Accurate digital control

Digital control enables signal indication for complete work programs with high accuracy.

### Specialized heating plate

The dedicated heating plate tube adopts a surround design to ensure uniform heating.

### Excellent exhaust Fan

Cooling air outlet, deliberately adapt to long hours of work, And no damage to the machine.

### Humanized slide-out Base

100% full slide-out base, convenient to spread the materials and prevent scald.

### Efficient pressure regulation

According to ergonomic design, easy to operate, Uniform pressure. Heavy duty press handle and structure.

- ★ This model has beautiful appearance, European and American style, easy operation and good performance.
- ★ The bottom pull-out printing plate slides smoothly and is suitable for large-scale heat transfer.
- ★ The heating plate adopts special precision wire and tube technology to effectively ensure uniform and stable temperature.
- ★ Time/temperature/piece LCD touch integrated watch, easy to operate.

## ● Specification

| Specifications | Power(kw)            | Voltage(v)      |
|----------------|----------------------|-----------------|
| 60*80          | 4.5                  | 110/220         |
| 70*90          | 7                    | 220/380         |
| 80*100         | 7                    | 220/380         |
| 100*120        | 9                    | 220/380         |
| Timerange(s)   | Temperaturerange(°C) | Packingsize(cm) |
| 0-999          | 0-399                | 108*88*65       |
| 0-999          | 0-399                | 199*98*70       |
| 0-999          | 0-399                | 134*108*70      |
| 0-999          | 0-399                | 163*128*72      |
